

Informatica Data Quality Training Curriculum

Working with Informatica Developer 9

- GUI
- Mappings Mapplets,
- Transformations Content Sets,
- Data Objects

Informatica Data Quality

- Analyst Collaboration,
- Reviewing information from the Analyst,
- Comments/Tags,
- Creating/adding to Reference tables

Developer Profiling

- Join Analysis profiling,
- Column Profiling
- ,Multi Object Profiling,
- Mappings and Transformations,
- Mid-stream profiling,
- Comparative Profiling

Data Standardization

- Cleanse transform and parse data
- Develop data standardization mapplets and mappings

Performing Address Validation

Reusable AV Transformation

AV Transformation Properties

AV Inputs and Outputs Reusable AV Mapplet

Matching

- Grouping data Analyze Detail Report,
- DQ Matching Cluster Analysis Report,
- Matching Mapplets

Identity Matching concept overview

- Build Matching mappings using Identity,

- Matching Identity Populations and Strategies

Performing Consolidation

Informatica Data Quality Assistant

- Build Mappings to create and populate the DQA tables
- Perform manual Consolidation and Bad Record Management

Power Center Integration

Object Import/Export concept

- Import Projects using both Basic and Advanced methods
- Export Projects

Informatica Data Quality for Excel

Run Data Quality Mappings on Excel Spread sheets
