

SAP SRM ONLINE TRAINING COURSE

CONTENT

What is SAP SRM?

SAP Supplier Relationship Management (SAP SRM) provides you with innovative methods to coordinate your business processes with your key suppliers and make them more effective. SAP SRM enables you to optimize your procurement strategy, to work more effectively with your supplier pool, and thus to gain long-term benefits from all your supplier relationships.

With SAP SRM you can examine and forecast purchasing behavior, shorten procurement cycles, and work with your partners in real time. This allows you to develop long-term relationships with all those suppliers that have proven themselves to be reliable partners.

The efficient processes in SAP SRM enable you to cut down your procurement expenses and to work more intensively with more suppliers than ever before.

The SAP SRM documentation offers a comprehensive description of the functional scope of SAP SRM, and highlights the relationship between the application and the underlying technologies.
