

# SAP ABAP OOPS ONLINE TRAINING COURSE

## CONTENT

### What is SAP OOPS?

In the R/3 product from the German software company, SAP, ABAP Objects is a programming language and part of the ABAP Workbench that allows developers to create and run applications that contain program objects. ABAP Objects includes a virtual machine that will run applications compiled with ABAP Objects language.

Like similar object-oriented programming languages, ABAP Objects supports the concepts of class objects, class and subclass inheritance, and polymorphism.

### ABAP OOPS Training Content:

- What is OOPS?
- Analyze and design classes (UML)
- Classes, instances, references
- Inheritance, interfaces, polymorphism
- Events
- Special object-oriented techniques
- Global classes/interfaces (Class Builder)
